

System Architect

Agnitio is looking for a System Architect who is proficient in web and desktop software development. We imagine that you have experience from an international development organization.

Your primary responsibility will be to create system designs, develop prototypes and perform architectural improvements to our existing technology base. You will be instrumental in the continued implementation of a service oriented architecture and the continued improvement of our server side components.

The ideal candidate possess the following qualifications:

- Strong OOD/OOP experience
- Strong SOA knowledge
- Strong JAVA/J2EE experience
- Architecture experience
- Database experience (Oracle, MS SQL, MySQL, SQLite)
- Strong communication and inter-personal skills
- Strong drive for continuous improvement
- Strong English skills
- A technical degree in Software Development

As System Architect you will be based in Copenhagen and will be expected to travel approximately 15-20 days per year. You will be part of the System Architecture Team and will report to the Lead System Architect.

Please direct your application to hr@agnitio.com marked "**System Architect**". Should you have any questions regarding this position, please direct your questions to Dion Jensen, Lead System Architect at +45 2916 6196 or dje@agnitio.com.

Agnitio is an international Closed Loop Marketing (CLM) software company providing clients in both Europe and the US with an "end-to-end solution", including CRM integration with leading providers. Agnitio is a Gazelle Growth company and was recently featured in a Gartner Group article on the CLM market space.
